Innovative and robust, this model is compatible with ice for rapid immersion or can be equipped with a chiller to maintain an ideal temperature throughout the session.

## COMPATIBLE WITH CHILLER & ICE

This tub can be cooled with ice or, more conveniently, connected to an electric chiller that lowers the water temperature down to 3°C, eliminating the need to handle 50 kg of ice each time.

Even better, the chiller can also heat the water up to 40°C, allowing you to switch from a revitalizing cold plunge to a soothing hot bath. A dual-function system ideal for alternating between intense recovery and muscle relaxation, all year round.
